

I pay for the service, why would I not be allowed to hear what I want to hear? I purchased satellite radio long before the localized traffic and weather was offered. In fact, it is currently NOT offered for my area. Upon purchasing XM radio service, I found it so fulfilling to my needs that I stopped listening to local radio from that point.

I feel that the government needs to focus on more important issues. Issues such as, the war in Iraq, the national budget, and our rising gas prices rather than protecting an inferior product from competition.

Isn't our country based in capitalism? hasn't the United States grown and prospered because we allow businesses to compete and become better, faster, stronger? I don't recall any government coming in and limiting a Wal-mart outlet from killing off the smaller businesses around it.
